Girard, F.
No. 601,612, filed Nov. 17, 1922.
Irradiation Device for Therapeutical
and Other Purposes.

June 11, 1923.

Examiner, Division 43:

The invention relates to a lamp designed for therapeutical purposes. The limitation in some of the claims to means refers to the reflector, 5, which apparently application to the body and therefore limits the in apeutical uses. This seems to be sufficient to exd from Class 240 and to warrant its retention in

Assistant Examiner, Classification

DEPARTMENT OF THE INTERIOR
UNITED STATES PATENT OFFICE

WASHINGTON

May 22, 1923.

Application of
J. H. Girard,
For Irradiation Device for
Therapeutical and Other Purposes,
Filed Nov. 17, 1922,
Ser. No. 601,612.

CLASSIFICATION.

To the

Chief of Classification.

Sir:-

The statement of the Examiner of Division 43 that the device in question is for general illuminating purposes, is contradictory to the specification and claims.

Applicant states that his device is an Irradiation Device for Therapeutical Purposes.

It is a heat producing apparatus to concentrate heat as well as light and provision is made to protect the skin of the patient from being burned.

The protective features are included in the claims and therefore it belongs to Class 174, in accordance with the decision of the Classification Examiner in the application of Murphy, No. 580,663, referred to by the Examiner of Div. 43.

The elements of the combinations covered by the claims, are specifically limited to the construction to a therapeutic lamp.

Respectfully,

G.H.

M.R. Sullivan.
